The MAILING DATE of this communication appears on the cover sheet with the correspondence address Period for Reply							
A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION. - Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication. - If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely. - If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication. - Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Objections

1. Claims 6-23 are objected to because of the following informalities: "releasibly" is misspelled and apparently should be --releasably--. Appropriate correction is required.

Claim Rejections - 35 USC § 112

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

2. Claims 6-23 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. The new limitation of submerged "within any liquid in a tank" was not presented in the original specification and therefore is being considered as new subject matter.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.
- 3. Claims 6-9 are rejected under 35 U.S.C. 102(b) as being anticipated by Aaron.

In regard to claim 6, the Aaron reference discloses a flush valve comprising a flush valve having a flexible tubing (30) having a first end and a second end, wherein the first end is dimensioned and configured to releasably attach to a tank outlet (about 48), and the second end is movable; a float (50,101) attached to the flexible tubing at two attachment points, a first attachment point proximate to the first end (about 72) of the flexible tubing and a second attachment point (threaded about 100) proximate the second end of the flexible tubing such that second end of the flexible tubing is submerged within a liquid in a tank in which the flush valve is disposed, and wherein the float is movable from a first position above the liquid in the tank and a second position submerged within the liquid in the tank; and an extension (120,124) attached to the float, wherein the extension is dimensioned and configured to move the float between the first position and the second position, and wherein the float is moved from the first position to the second position, a siphon is created within the flexible tubing. In regard to claim 7, the float is attached to the flexible tube via two apertures passing through the float (one about 114 and another one about 68), wherein the apertures are dimensioned and configured to engage an outer surface of the flexible tube (about 72). In regard to claim 8, when the float is in the first position, at least one cross-sectional portion of the flexible tubing lies in a plane that is perpendicular to a surface of any liquid in a tank in which the flush valve is disposed and wherein the cross-sectional portion is above the surface of the liquid (see Fig. 1). In regard to claim 9, the flexible tubing inherently has an inverted U-shape as is decent (see Fig. 3).

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

- (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 4. Claims 10-23 are rejected under 35 U.S.C. 103(a) as being unpatentable over Aaron in view of the applicant disclosure on the last paragraph of the last page of the specification.

Aaron discloses all of the limitations as discussed above and further discloses a fill valve associates with the float as claimed except for the fill tube as claimed. The fill tube as claimed is well known in the toilet tank art, which connects the fill valve to the overflow tube. As indicated by the applicant on the last paragraph of the last page of the specification that "an important note that fill tube 29, used to fill the toilet bowl, is not necessarily needed with this type of flush valve," it is the examiner position that the float type flush valve of Aaron could have a fill tube as desired depending on the particular user.

Conclusion

5. Applicant's amendment necessitated the new ground(s) of rejection presented in this.

Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a).

Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee

Art Unit: 3751

pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.

6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Tuan N. Nguyen whose telephone number is 571-272-4892. The examiner can normally be reached on Monday-Friday (10:00-6:00).

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Justine R. Yu can be reached on (571) 272-4835. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
